

## Broomhill Festival 2020 - Cryptic Crossword Puzzle

The eight unnumbered clues all relate in some way to this year's Festival theme. They include wordplay only - they don't include definitions. One of the solutions should be written in the space provided above the grid, and the rest should be slotted into the grid so that they check with other answers.

Some have single word answers - others do not. Three answers need to be modified before being entered, in a way that might be regarded as unorthodox.

These eight clues appear in alphabetical order by solution, including the first pair, arguably.

The numbered clues are of the type normally associated with cryptic crosswords, with Across clues generally being more straightforward than Down clues.
